Module 8
Advanced SOA Design & Architecture

Service-Oriented Architecture Types
- service
- service composition
- service inventory
- service-oriented enterprise

Enterprise Service Bus
- base
- expanded

Service Inventory
- patterns*
- Domain Inventory (123)
- Service Normalization (131)
- Logic Centralization (136)
- Schema Centralization (200)

Service Design
- patterns*
- Decoupled Contract (401)
- Contract Centralization (409)
- Official Endpoint (711)
- Service Facade (333)
- Concurrent Contracts (421)
- Redundant Implementation (345)
- Service Data Replication (350)
- Legacy Wrapper (441)

Orchestration
- base
- expanded

Service Broker (707)
- Intermediate Routing (549)
- Asynchronous Queuing (582)
- Reliable Messaging (592)
- Policy Centralization (207)
- Rules Centralization (216)
- Event-Driven Messaging (599)

Messaging Metadata (538)
- functions
- Service Agent (543)

Service Composition
- patterns*

Data Format Transformation (681)
- Data Model Transformation (671)
- Protocol Bridging (687)
- Process Abstraction (182)
- Process Centralization (193)
- State Repository (242)
- Compensating Service Transaction (631)
- Atomic Service Transaction (623)
- Rules Centralization (216)
- Data Model Transformation (671)

Service Design
- patterns*
- Decoupled Contract (401)
- Contract Centralization (409)
- Official Endpoint (711)
- Service Facade (333)
- Concurrent Contracts (421)
- Redundant Implementation (345)
- Service Data Replication (350)
- Legacy Wrapper (441)

* Numbers in parenthesis are page references from “SOA Design Patterns”.
