## Cloud Technology Lab

Arcitura®  
CERTIFIED  
Cloud Technology  
Professional

### OVERVIEW

This course module presents participants with a series of exercises and problems designed to test their ability to apply their knowledge of topics covered previously in course modules 1 and 2. Completing this lab will help highlight areas that require further attention, and will further prove hands-on proficiency in cloud computing concepts, technologies, and practices as they are applied and combined to solve real-world problems.

As a hands-on lab, this course provides a set of detailed exercises. Both individual and group exercises are provided that require participants to solve a number of interrelated problems, with the ultimate goal of assessing, measuring and planning for the deployment of cloud-based IT resources, and establishing cloud computing technology architectures based on Software-as-a-Service (SaaS), Platform-as-a-Service (PaaS) and Infrastructure-as-a-Service (IaaS) delivery models.

For individual completion of this course as part of the Module 3 Study Kit, a number of supplements are provided to help participants carry out exercises with guidance and numerous resource references.

Duration: 1 Day

### TRAINING + CERTIFICATION

This course is part of a training and accreditation program through which official certification can be achieved and for which official training and certification badges can be issued.

### eLEARNING + PRINTED STUDY KITS

This Arcitura study kit includes the contents listed below. These course materials are available in full-color printed format, as well as in eLearning subscription format, via online access and offline file download.

- Lab Exercises Booklet
- Self-Study Guide
- Mind Map Poster
- Flashcards
- Audio Tutor Recordings (usb)
